

Introducing | Patterned Heat Transfer Vinyl Film

The Lumina[®] 9203 Series features a full line-up of pre-printed, patterned heat transfer vinyl films that are great for garment decorators, crafters, and do-it-yourselfers.

Unlike other products on the market, these films do not require a separate mask for application, which saves time and money. 9203 Series can be applied to cotton, polyester, and poly/cotton blends at 315° F for 15 seconds.

New to the offering is nine patterns that are available in sheets and 15" by 5-yard rolls. As part of FDC Graphic Films, Inc.'s sheeting program, distributors can order custom sizes, variety packs, and much more.

Additional Lumina[®] HTV patterns include animal prints, camouflage, and slightly textured films.
